

THE RURAL MUNICIPALITY OF CORNWALLIS

DESTRUCTION OF PESTS - BEAVER CONTROL

Reference	Economic Development Services	Classification	Policy
Subject	Compensation to Trappers for the removal of problem beaver	Pages	1
Authority	Council	Effective Date	February 15, 2011
Approved	February 15, 2011	File Reference	7121

PURPOSE

The purpose of this policy is to provide the municipality with guidelines for compensation to trappers for the removal of problem beaver from the municipality as identified and authorized by Council.

Policy:

That trappers must obtain a Municipal Beaver Removal Authorization Form from the municipal office that authorizes him/her to remove beavers from the areas designated on the form. Once the beaver has been removed, the trapper will sign the declaration and submit the form to Manitoba Conservation along with any evidence that may be required as proof that the task was completed.

The summer beaver removal program runs from May 1 to September 30. It is the municipalities responsible to compensate the trapper directly and make any claim allowable to Manitoba Conservation at the end of the program.

Be it resolved that the municipality reimburse trappers forty dollars per beaver, for problem beavers authorized for destruction by the municipality.
